## add more voices

add more voice to your projects

Last Updated: 2/25/2020

## More voices

---

On your computer (windows 10), go to settings, then go to "time and language", then "language" (+ add preferred language) (choose a language to install)

## get audio modules

---

Get many new voices in the audio - "Speech Syntheses settings" voices

Add audio - AudioToolBox plugin

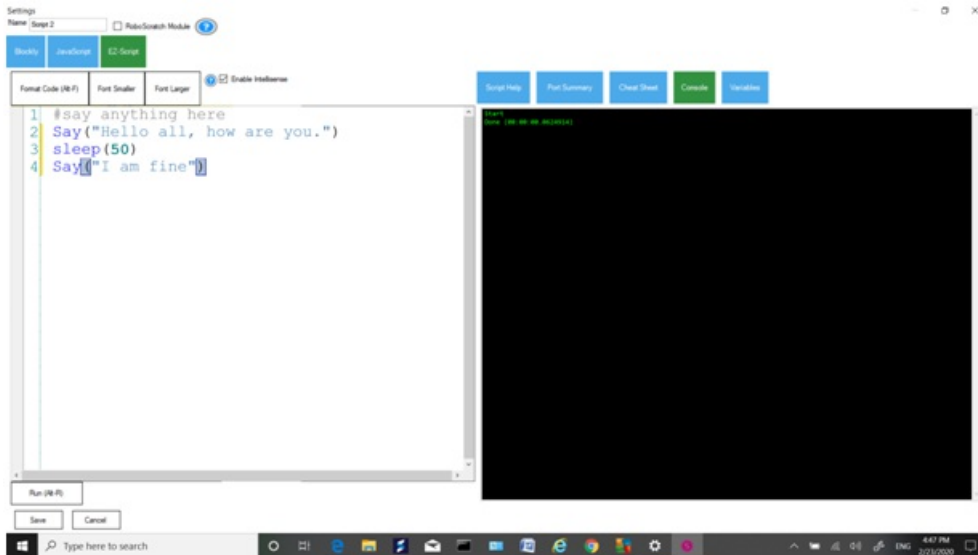

## Open a script, add:

ControlCommand("AudioToolBox Plugin", "ImportUWPVoices")

## 5 Add another script and then save

Then check your "Speech settings" voices " all the ones you added will be there " Add another script and then save

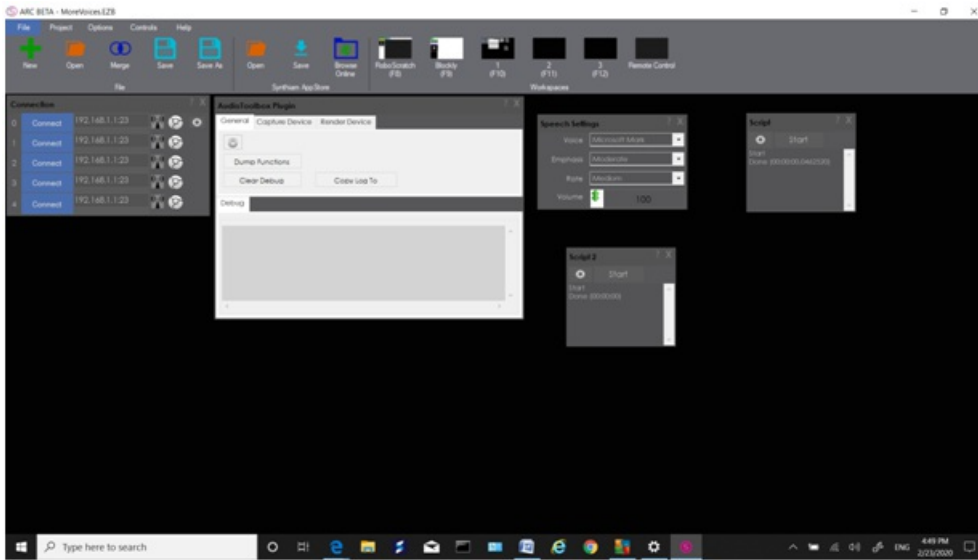

for this scrip:

your computer's audio

code: ( you can say anything here) I just put:

Say("Hello to all, how are you") sleep(50) Say("I am fine")

Mark voice <https://www.trishtech.com/2016/12/enable-hidden-text-to-speech-voices-in-windows-10/>

That is it, enjoy! EZAngi»¿
