

your robot gives you the lottery number (python language)

Here is a python script, which will give you the lottery numbers to play.

Last Updated: 1/17/2021

The program is planned for a draw of 5 numbers and a lucky number. (French lottery).
You will need to change the lottery program in your country.

here is the python code:

Code:

```
i»;import random

def loto():
    table1 = [(random.randint(1,49)), (random.randint(1,49)), (random.randint(1,49)), (random.randint(1,49)),(random.
    tablefin = []
    doublon = []

    for i in table1:
        if i not in tablefin:
            tablefin.append(i) #supprime les doublons
        else:
            doublon.append(i) #extraire les doublons
    d = len(doublon)
    while d > 0:
        #nouveau tirage
        doublon = []
        table1 = [(random.randint(1,49)), (random.randint(1,49)), (random.randint(1,49)), (random.randint(1,49)),(ran
        # recherche doublon
        for i in table1:
            if i not in tablefin:
                tablefin.append(i) #supprime les doublons
            else:
                doublon.append(i) #extraire les doublons
        # si il existe doublon d+1 et vide la table
        if (len(doublon)==1)or(len(doublon)==2)or(len(doublon)==3)or(len(doublon)==4)or(len(doublon)==5):
            talkBlocking("j ai trouver un doublon , je refais un tirage")
            d = d+1
            doublon =[]
        else:
            d = 0
        break
    # tri la table avant de la dire
    table1.sort()
    Audio.Say("Voci les numÃ©ros a jouer au loto .")
    Audio.Say("le "+str(table1[0]))
    Audio.Say("le "+str(table1[1]))
    Audio.Say("le "+str(table1[2]))
    Audio.Say("le "+str(table1[3]))
    Audio.Say("le "+str(table1[4]))
    Audio.Say("Et le numÃ©ro chance le, "+str(random.randint(1,9)))
    Audio.Say("Je vous souhaite bonne chance, ")

loto()
```

you will need to translate the sentences into the language of your country:

example:

```
Audio.Say ("Here are the numbers to play the lotto.")
```

if you won, think of me, thank youï»¿ ...

note :

To make the EZROBOT micro-controller speak, replace Audio.Say by Audio.SayEZBï»¿ .
If you are interested in pthon programs, I can give you more here.
